

The difference is measurable™

**FRANZ MELLER APPOINTED AREA SALES MANAGER
FOR INSTRON TESTING SYSTEMS IN AUSTRIA**

At the beginning of 2013, Franz Meller, BSc, became Area Sales Manager for Instron testing systems in Austria. Based in Dobersberg/Austria, he is now the contact for the whole of Austria for all matters involving the purchase, modernisation and maintenance of Instron testing systems and equipment. This covers static and dynamic systems for tensile, compression and flexural testing, drop impact and pendulum impact devices, and systems for measuring the thermomechanical and rheological properties of materials. Meller, a trained mechanic with a degree in industrial engineering, was born in 1976. Previously he was Technical Manager in an Austrian company, where he was responsible for the development and production of customised products.
