

# Bluehill® Universal

## Introduction to Test Method Development

### Objectives

After completing this course, you will be able to:

- Run tests, generate graphs, and produce test reports
- Setup calculations and test results
- Create, save, and retrieve test methods and sample data files
- Configure the User Interface
- Setup test control parameters
- Export results and raw data
- Streamline your workflow using Bluehill best practices

## Overview

In this one-day course, students will work with a certified Instron training instructor to explore the basic tools and features of Bluehill Universal. Using a hands-on approach, the instructor will guide students through a series of projects designed to foster an understanding of basic Test Method development.

## Course Outline

### Basics of Test Method Development

Section 1 - Safety Best Practices and Running Your First Test

Section 2 - Inputs and Test Controls

Section 3 - The Console and Workspace

Section 4 - The Results Table and Graphs

Section 5 - Exports and Report Tab

Section 6 - Workflow and Choice Inputs

Final Project

# Frequently Asked Questions
